How to Use ZoomIt Software to Write on Desktop and Laptop

1. Download ZoomIt software from this link: **ZoomIt.zip**.

2. After downloading, unzip the folder.

Number 1: Zoom

- To start zoom: Press Ctrl + 1 to zoom in.
  - Pressing Ctrl + 1 allows you to zoom in on the content.
- Use your mouse wheel to zoom in or out.
  - Utilize the mouse wheel to zoom in or out for precise adjustments.
- To exit zoom mode: Press the Esc key or click the right button of your mouse to exit zoom mode.

Number 2: Drawing in Zoom Mode

- When you are zoomed in (Ctrl+1):
  - To enter drawing mode: Press the left button of the mouse to start drawing mode.
  - To center the cursor, press the Space Bar.
  - To draw a straight line: Press Shift and the left button of the mouse and draw the line.
  - To draw a rectangle: Press Ctrl and the left button of the mouse and draw the rectangle.
  - To draw an ellipse: Press Tab and the left button of the mouse and draw the ellipse.
  - To draw an arrow: Press Shift + Ctrl and the left button of the mouse and draw the arrow.
  - To erase a previous entry: Press Ctrl + Z.
  - To erase all drawings, press the button 'e'.
  - To type something on the screen: Enter the drawing mode (press the left button of the mouse) and then press the letter 't'.
  - To change the width of the pen: Press Ctrl and use the wheel of the mouse to increase/decrease the pen width.
  - To change the color of the pen: Enter the drawing mode and press the key:
    - 'r' (for Red),
    - 'y' (for Yellow),
    - 'g' (for Green),
    - 'p' (for Pink),
    - 'o' (for Orange).
  - If you need a completely white background, then: Enter the drawing mode (press the left button of the mouse) and press the key 'w'.
  - If you need a completely black background, then: Enter the drawing mode (press the left button of the mouse) and press the key 'k'.
  - To exit: Press the right button of the mouse.
  - To copy a zoomed screen: Press Ctrl + C or Ctrl + S.

Number 3: Drawing without the Zoom Mode

- In case you just want to draw on the regular screen without zooming, press Ctrl + 2.
- To enter the drawing mode: Press the left button of the mouse to start drawing mode.
- Then follow the steps given in Number 2 for drawing lines, rectangles, ellipses, arrows, adding text, etc.
